**Speech and Language Therapy  
for German-speaking children  
at the International School, Farmington Hills**

Children who grow up in a multilingual environment sometimes have difficulties in their speech and language development. To support these children in their speech and language development as early as possible and to prevent further dysfunction, I provide speech and language therapy to German-speaking children.

What I offer:

- **Counseling** for multilingual families - "How can I support my child's speech and language development in a multilingual world?"
- **Diagnosis** of speech, language, voice, and swallowing disorders
- Treatment of false or inarticulate **pronunciation**
- Improvement of German **vocabulary** and **grammatical** skills
- Improvement of **lip and tongue flexibility**, and development of the correct swallowing pattern to prevent dental malposition
- Treatment of the **voice**, such as hoarseness
- Facilitation of **dyslexia**

Counseling and treatments are offered in German as well as in English, except for language therapies that I only offer in German.

If you are interested or have questions, please don't hesitate to contact me. I also offer a complementary initial conversation.

I am looking forward to hearing from you.

Best regards, Sabine Regaard
